

DEPARTMENT OF MATHEMATICS
Spring 2023 MATH Colloquium Series

Informing Students about Cal-Bridge and REUs

Dr. Chris Dugaw

Dept. of Mathematics, Cal Poly Humboldt

Graduate school opens up additional opportunities for mathematics majors. Any student who has ever considered the possibility of attending graduate school should know about the two excellent programs I will address in this colloquium: Cal-bridge and Research Experience for Undergraduates (REUs). Cal-bridge is an amazing program to mentor and support students through their final two years of undergraduate school and the transition into the first year of graduate school. This program provides up to \$10,000 of scholarship per year! REUs provide students with paid summer research internships that give a taste of the graduate school experience. The first half of the colloquium will be an overview of Cal-Bridge, REUs and how to apply. The second half will be an extended question and answer period with students who are currently participating in these programs.
